Work experience

Resource experience	Description	BU feedback
Account name 1: Royal Bank of Canada Project name: I&TS Start date : April 8th 2022 End date : May 19th 2023	1)Good command in SDLC and various models like Agile, V model, iterative. 2)Knowledge and experience in Planning, designing, and executing scripts. 3)Understanding the requirements and Functional Specifications of the application. 4)Performed system Integration Testing and Regression Testing of the developed code. 5)Involved in creating and maintaining Requirement matrix for the test cases. 6)Involved in execution of the test cases. 7)Involved in creating and updating the test results in ALM for tracking. 8)Give Demo to client and get Sign off	Additionally, acquired practical experience in Camunda BPMN 7 and 8, honing skills in process design and execution. (4 weeks)
Account name 2: Element Fleet Corp Project name: Driver Ordering Start date : June 2023 End date : May 2024	1)Experience in creating and providing feedback on testcases, test progress. 2)Understanding the Business Requirements and Functional Specifications of the application. 3)Test Estimations and Identifying the required Test scenarios. 4)Preparing the Test Plan, Test Cases and Performing Test Execution as per Requirements. 5)Scheduling the meeting with team to discuss on the defects and testing status. 6)Defect Reporting and Tracking using JIRA.	Additionally, acquired practical experience in Camunda BPMN 7 and 8, honing skills in process design and execution. (4 weeks)

Detailed feedback by CUs

Technical

Has proficiency in BPMN notations for simple process flows and DMN for BPMN design, though additional practice is needed for mastering diverse DMN rules. A strong grasp of gateways is evident. Additionally, should dedicate time to hands-on practice for a thorough understanding of task implementation.

If you are a new joiner and don't have technical work experience, please fill any other assignment/project details where you were exposed to any technical work

Power Up

He gives well-structured responses, but he should work a little on his communication style
